

NOTICE TO RESIDENTS

INFORMATION AND WARNING SYSTEM

BE INFORMED!¹

The City of L'Île-Perrot's computerized information and warning system is used mainly to inform you of specific health and safety events such as boil water advisories, water supply breakdowns, street closures, etc.

The objective is to rapidly contact and inform residents affected by a situation. The service broadcasts alerts via different channels (voice call, text messaging, email) according to residents' programmed preferences.

This service is offered free of charge to all residents of L'Île-Perrot. Since the system responds to an important need to be able to communicate with residents during major events and to coordinate the dissemination of information, the City encourages all residents to register on the mailing list.

How to register

To receive City alerts, simply register in our database by filling out the electronic form on the City's website. You have to enter your first and last name, together with the following personal information:

- Address
- Email address
- Phone numbers
- Language of communication

The information provided will be kept confidential and will only be used by the City for purposes of communication.

If you have any questions or wish for more details about the information and warning system, the City invites you to contact the Administrative Assistant for the Executive Management at 514-453-1751, extension 236.
